## **BOOK SYNOPSIS**

How to Prove god Does Not Exist is the complete guide to the nonbeliever stance. The most diverse validation of atheism ever written, it deconstructs every major criticism of atheism and defense of religion through logical, philosophical, historical, cultural, moral and scientific means. This builds towards a more strident approach towards asserting atheism, with five key justifications outlined for why god does not exist. This expansive work employs the philosophy of Epicurus, David Hume and Friedrich Nietzsche, the science of Charles Darwin, Albert Einstein and Stephen Hawking, plus the logic of Bertrand Russell, the psychoanalysis of Sigmund Freud, and the contemporized insights of New Atheism advocates such as Christopher Hitchens and Richard Dawkins. It features original concluding insights with prominent atheists such as scientists Vic Stenger and Michael Shermer, plus philosophers Peter Singer and Michel Onfray. There are also unprecedented views of atheism by notable believers, including the 21st centurys leading Christian philosopher, Professor Richard Swinburne, while journalist Peter Hitchens unveils why his late brother Christophers arguments for atheism were "unoriginal, trivial and often ill-informed." The all-encompassing How to Prove god Does Not Exist is the complete armory of arguments that every atheist should know.
